DESIGNATIONS

KEY FEATURES AND BENEFITS

- Direct air and surface sterilization of DNA-based contaminants.
- Mounts flush with lay-in ceiling grid or plaster ceilings (Type E & Type M).
- 2' x 4' units can use two fluorescent and two germicidal lamps, or four germicidal lamps per fixture.
- 1' x 4' unit uses two germicidal lamps.
- Germicidal lamps are 254 nm / 12,000 hour life. (less than 8mg of mercury/lamp)
- Lamps are well shielded for vision safety.
- Spectrally-polished reflectors maximize UVC output.
- "Egg-crate" louver allows UVC energy to pass and additional reflectivity.

APPLICATIONS

- Hospitals
- Clinics
- Clean Rooms
- Testing Facilities
- Prisons
- Pharmaceutical Manufacturing
- Laboratories
- Institutional Buildings
- Areas requiring clean upper air treatment for occupants.

SPECIFICATIONS

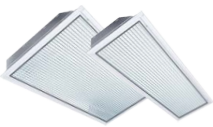

Wattages 30, 60
Input Voltages 120-277vAC
Body Material Aluminum

Reflector Spectrally-polished reflective "egg crate" louvre
Ultra Violet Lamps #GML005 (Germicidal Tube)
Fluorescent Lamps #F40T12 (Fluorescent Tube)
